

Last Friday, St. Croix County Public Health advised that there are currently over 150 new/active COVID-19 cases in St. Croix County. Due to the rapid rise in the number of cases, St. Croix County is now considered a hot spot. There are now more active cases in the County than have recovered.

Please continue to practice good hygiene: wash hands, use hand sanitizer, wear a mask and social distance (minimum of 6 feet) as much as possible. As always, if you or someone in your family is sick, please stay home and seek the advice of your medical professional.

For additional information, please continue to review guidelines from St. Croix County Public Health and the Center for Disease Control.
